New Brunswick, NJ-- On July 13, 2011 Try Us Health Care Services was honored by the March of Dimes Central New Jersey, at the Brystol Meyers Squibb Children's Hospital at Robert Wood Johnson University Hospital for being site sponsors for the 2011 Middlesex March for Babies.

Try Us Health Care is committed to the goal of promoting health and healing for our children. To that end, Try Us will be family team state sponsors for the New Jersey March of Dimes at the 2012 March of Babies.

Richard Smith, Director of Public and Professional Relations at Try Us Health Care services, will be serving as the 2012 chair for the Middlesex county March for Babies. He has challenged all existing supporters of the March of Dimes and potential supporters to try something unprecedented—to dream big. Richard has proposed a challenge, “what would you do if you were told that we would be able to create an environment where all babies could be born healthy?” A big dream, a big goal? No goal is too large, too hard, or unworthy when it comes to the best care possible for our children. This is what the March of Dimes strives for and Try Us Health Care is fully committed to supporting this initiative.

The mission of the March of Dimes is to improve the health of babies by preventing birth defects, premature birth, and infant mortality through research, community services, advocacy, and education. Research under the umbrella of the March of Dimes includes but is not limited to SIDS, Down Syndrome, Neonatal Stroke, Immune Deficiencies, Premature Birth, Birth Defects, Epilepsy, Muscular Atrophy, Autism, and Spina Bifida.

The family teams are composed of individual families and friends who participate in the March of Babies in celebration of or to honor a special baby in their lives. In fact, many people walk in memory of a baby who did not survive. The family teams are integral to the efforts of the March of Dimes' Mission as they remind us all of just how important it is for us to give all babies the opportunity to be born healthy.

In November Try Us will be co-hosting the 2011 March of Dimes New Jersey Chapter Nurse of the Year Award ceremony and sponsoring the inaugural 5k for Babies run. For more information about the March of Dimes and how you can become involved please visit [Marchofdimes.com/newjersey](http://Marchofdimes.com/newjersey).

Caring for kids starts from pregnancy and there is nothing more important than the health and healing of our children.

*For over twenty years, Try Us Health Care Services has focused on providing quality nursing care that conveys comfort to kids, their families, friends, and caregivers. Try Us offers a wide range of home care services and works in association with many ancillary support companies to provide a total resource portfolio for your individual health care needs. For more information please visit us at [Tryushealthcare.com](http://Tryushealthcare.com) or call 973-433-0606.*
