Caring for Kids™

Because...

*There is Nothing More Important
than the Health and Healing
of Our Children*

The ABCs of Caring for Kids

Although we provide care for our clients of all ages, **TRY US HEALTH CARE SERVICES** focuses especially on *pediatric home health care* supporting the special needs of children and their moms and dads, brothers and sisters.

For over twenty years, **TRY US** has been providing nursing care that conveys comfort and confidence to kids and their families.

For the Care that Comforts Children

Doctors, nurses, discharge planners, and social workers have come to depend on **TRY US** for their patients who are ill or are recovering from illness or surgery. They depend on **Us** for their patients who have disabilities and chronic illnesses or their patients who require rehabilitation. And they have come to depend on **Us** for their patients and families who are in need of very special care when there is no cure.

The Caring Difference in Pediatric Home Care

TRY US is uniquely qualified. Working with you, we develop the right care plans along with the right services and support for every child's needs. We then satisfy and fulfill the requirements of those care plans while we evaluate and monitor the child's progress every step along the way. We are committed to making a difference by delivering high quality, cost-effective clinical, economic, and patient-satisfaction outcomes.

TRY US offers special therapies and early interventional services; we work with other care and support agencies in providing total solutions for our kids requiring home health care.
